

Unlucky Days.
Days of the week are many. The following
is an old Scotch rhyme, not
noted nowadays:
Monday for wealth,
Tuesday for health,
Wednesday the best day of all;
Thursday for crosses,
Friday for losses,
Saturday for no day at all.

A rainy day was always con-
unlucky for a wedding. Here is
a general regarding lucky and un-
lucky:

Born of a Monday,
Fair for a Tuesday,
Full of God's grace;
End of a Wednesday,
Many a gift given;
Born of a Thursday,
Four days to go;

Born of a Friday,
Gaily given;
Born of a Saturday,
Never long living;

Born of a Sunday,
Never long living;

Not the week

And the end on't.

idea of Friday being an unlucky

and almost universal, and it is known

as "the dog's day." Saturday,

the best day of all;

Monday for crosses,

Tuesday for losses,

Saturday for no day at all.

IN ADVANCE.

WEYMOUTH FAIR.

The report of the first day of the fair of the Weymouth Agricultural and Industrial Society, published last week, gave particulars of the exhibition in the hall in some departments, further details of which are now continued.

The unfavorable weather of the opening day did not dampen the enthusiasm of the visitors, and the attendance that day was very gratifying to the managers, about \$1000 being taken for admission at the gate. On the grand opening day there was a goodly turnout. The grand attraction of the day was the exhibition of Humphrey's celebrated troupe of trained animals, which started at 11 a.m., trained 3 p.m., and gave the most unbounded satisfaction to a delighted audience. The beauty of the animals, the skill of the manager, was a striking exhibit of the patience and skill of their trainer, and the interest of the spectators at our local fairs.

The Weymouth Band was present Friday and gave a fine musical entertainment through the afternoon. The band of experts was ample in variety, the draught horse exhibition occurring at 10 a.m., walking horses at 11 a.m., 25 race at 1 p.m., and the grand march at 2:30 p.m. between the H. & L. teams of South Weymouth and North Abington; details of the events will be given in another column.

Some morning promise of another fine day, and a large company again gathered at the grounds, to witness the grand exhibition which ensured the financial success of the fair, the entire receipts being over \$2000, as estimated. A ticket for a quarter of a century, was on hand as usual, and it has been suggested by friends of the society that a portion of the proceeds be turned over to him for his faithful service of 25 years.

The American Band occupied the stand on Saturday, and then the attractions for the day were much too late attractions. The sports commenced at 10:30 a.m., with a wagon race, followed by running race, for 100 yards, and in the afternoon races were in line, pacing race, trotting for \$100 purse, free to all, bled racing, and base ball match between the East Weymouth and King Phillips' until night came, when the clubs were tied at 4-4.

While the sports were in progress the exhibits objects of attraction were objects of attraction to many, among them being a fine show of canes, sticks, and umbrellas, a stock and lamp show of fowls and pet animals in the hall at the grand stand. Of stock, the most noted was the herd of Devon cattle, and King Phillips' team of full blood Jersey and half blood, and a fine show of stock was made by Alvan Haymond, of W. C. Curtis, and others.

The show was better than ever before, A. Raymond exhibiting the fast falk fort, C. E. Brewster of Norwell, a litter of 8 pigeons, and a pair of swans, and a pair of penguins, and a show of fowls and pet animals in the hall at the grand stand. Of stock, the most noted was the herd of Devon cattle, and King Phillips' team of full blood Jersey and half blood, and a fine show of stock was made by Alvan Haymond, of W. C. Curtis, and others.

The Boston Record makes a statement that corruption was attempted to secure Walker's support for Crapo, and that Bicknell also secured first premiums for Preston. Preston had an excellent collection of mounted specimens, and a choice registered Jersey bull, Thomas J. Nash a full blood Holstein and J. H. Leach a full blood Devon bull.

The show was better than ever before, A. Raymond exhibiting the fast falk fort, C. E. Brewster of Norwell, a litter of 8 pigeons,

and a pair of swans, and a pair of penguins, and a show of fowls and pet animals in the hall at the grand stand. Of stock, the most noted was the herd of Devon cattle, and King Phillips' team of full blood Jersey and half blood, and a fine show of stock was made by Alvan Haymond, of W. C. Curtis, and others.

The Electric.

A test of the engines at the works of the Weymouth Electric Light and Power Co. was made on Wednesday with satisfactory results, and efforts are being made to have machines in readiness to test the lamps tomorrow evening, though no contract for the street lighting has yet been made.

The display of mounted specimens, acting the role of better than ever, rare display of elegant embroideries, needlework knits, afghans, quilts, rugs, etc., interesting a collection of dried flowers, and a show of birds.

The hucksters, a refreshment purveyor drove a brisk trade Friday and Saturday, but on Sunday was held a day of rest for the fair, and was a large success.

In general, the articles were noted a great number of orders for his improved heater, which possesses superior advantages for economical heating in the position of the coils, which are placed over the fire-box, instead of being in direct contact with the fuel, thus preventing the caking of the fuel and securing the fullest development of heat.

It is fitted with a patent lever grating shaker, and has an addition of air pipe, to utilize the heat of the air, and make it a more durable and economical device for heating dwellings, stores, and public buildings, and will give greater economy in its introduction, the heat giving entire satisfaction to every purchaser.

An account of the curiosities shown by Mr. Easton, who had a fine collection of minerals, was given in last week.

It was well worthy of a prize, but as it did not come under any especial premium head, a diploma was given.

The orchids of Mr. Geo. Hollis were four in number; two of them, oncidium splendens, were growing on small stems of wood, and the other two were about their roots, and were abundantly flowered. The spikes were about four feet long, and much branched, and the flowers were like bunches of cowslips floating in the air. They were fine specimens, and are natives of Brazil, and larger ones had first prize.

The other two, which were quite a species, were growing on small stems of wood, and the other two were about their roots, and were abundantly flowered.

The spikes were about four feet long, and much branched, and the flowers were like bunches of cowslips floating in the air. They were fine specimens, and are natives of Brazil, and larger ones had first prize.

Rev. W. L. Jordan of North Weymouth, spoke as follows:

"The burning question of the hour is, shall the world be evangelized. We have not been able to answer this question, but we are anxious to know if the world can be evangelized, and if so, how.

"We have already demonstrated that the gospel that they carry is world wide in its scope. They have proved that it was meant for the world, and that time will come when the young men who want to convert the heathen, will have a better opportunity than ever before.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

"The time is ripe, the world is ready. Shall we wait for another year? No, we must go now.

The Fox and the Rabbit.
"All avens," said a Fox to a Rabbit one day—
"The same things often relate in the South—
'You shall be Mr. Rabbit, ere sunset my
gray!'"

And he threatened him fiercely with wide-open mouths.

The Rabbit set off at the top of his speed,

"Run away by night, to get out of the
danger."

But, holly pursued, soon discovered the need

Of adopting a trick to effect his escape.

He ran to a well-curtained which chanced to

be high.

A windfall that two species buckets per-

sisted,

And lying in one—both were empty, and

dry—

Very quick at the bottom found safety

and rest.

None of the buckets thus suddenly fell.

The other and lighter rose equally fast;

And when Reynard arrived at the top of

He thought to himself, "I have got you at
last!"

"My friend, why didn't you take them both
with you?"

Said the Fox, as he bowed to the one that
now swung.

So high and invincible. "This nonsense will
end!"

And into the bucket exulting he sprang.

You see his mistake; for his heavier weight

To the surface the Rabbit fled speedily

Who said, while ascending, "Life's changes
are great—

Now up and now down! Mr. Reynard,
adieu!"

Then off hopped the Rabbit, and lived, I
suppose.

Esteemed by his friends, to a happy old
age;

While the Fox, when the day came at last
to a close,

Was caught by a farmer and put in a cage.

Now all of this proves what has often been
said

Of the slips that occur 'twixt the lip and
the nose;

So if you do not boat—there are hazards
abroad—

It don't loss courage—you soon may
see up.

—Philip B. Strong in *Wide Awake*.

PRUDIE'S FORTUNE.

"But, Prudie, you can't mean it!" cried Joe Barton, with a quick look of startled appeal.

"But I do mean it, though, Joe," replied Prudie, emphatically, and, it must be confessed, a little spitefully, too.

"But think of all that's passed be-
tween us, Prudie," pleaded Joe, earnestly.

"I have thought of all that," said Prudie, "and that's what caused me to make up my mind. When a young man abuses—yes, abuses," she repeated, answering the indignant look in Joe's face, "the young lady he pretends to love, just because she accepts a trifling courtesy from a mere acquaintance, I think it high time for that young lady to assert her rights!"

"Trifling courtesy," exclaimed Joe, his face getting red, and his temper rising again in spite of himself. Trifling courtesy, indeed, for an engaged young lady to walk home from singing school with a man who is almost a stranger, and stand with him holding her hands, for half an hour in the moonlight at the gate!"

"Half an hour!" cried Prudie, indignantly.

"Yes, half an hour," repeated Joe, doggedly, "and a man you know nothing about, either."

"I know he is handsome," said Joe, and rich, and lives in the city, and his name is Mr. Richard Willis," said Prudie, mischievously.

"I suppose he is handsome," admitted Joe, "and he may be rich and live in the city; but, Prudie, he can never love you as I do."

"As to that, I'm sure I don't know," said Prudie, with a little toss of her head.

"But I do, Prudie," said Joe, gently, a tender light coming into his eyes as he looked at her. "And you must admit that you know really nothing about him, after all. And I shouldn't wonder a bit if it isn't just because he knows that Aunt Dorothy has left you all her money that he has made up to you so suddenly," he added, reflectively.

"Oh, you believe that, do you, sir!" cried Prudie, with a flaxen smile. "Well, I am sure now, Mr. Joseph Barton, that you and I could never agree, and so the sooner this foolish engagement is broken the better. Hero is your ring, sir. Now go, and I hope I shall never see your face again!"

And with that she tore the slender, pearl-set band from her finger, and throwing it at Joe's feet in the most approved theatrical manner, turned away proudly and walked toward the house.

Poor Joe picked up the little ring, and pressing it to his lips, placed it in his pocket and walked slowly and mournfully away.

Joe and Prudie had been engaged for two or three years, and although the day is not yet publicly named, it was known that the wedding would take place very shortly. Then Prudie's aunt died, and, of course the wedding had to be postponed. But as it so happened that the court of law did not sit for her inconvenient demise, Aunt Dorothy, by her will, had left to her beloved niece, Prudie More, all bonds, mortgages and other negotiable property deposited by her in the Galestown bank; and though it could not be known what amount of money these securities represented until after the will was proved, rumor made it a great fortune.

Just then a little cloud had appeared on the horizon of the lovers' hitherto cloudless courtship in the person of Richard Willis, who was spending his vacation in the village, and an amusing himself by flirting with all the pretty girls who were at all addicted to that pretty vice. He had not yet paid any particular attention to Prudie, however, until very recently, when he suddenly turned upon her the full force of his manifold charms, with what success the reader already knows.

So matters went on for several weeks, until it was common talk among the village people that Richard Willis had "cut Joe Barton out," and that poor Joe was slowly dying of a broken heart.

One evening Prudie and Richard Willis came home from singing school together, as usual, and were standing at the gate in the moonlight.

"Prudie, he said, in a low, tender voice, "do you love me?"

"Yes—i think I do," faltered Prudie, blushing.

"And you will be my wife! Come, dearest, say you will."

Life is too short to be spent in nursing animosity or registering wrong.

LADIES' DEPARTMENT.

HINTS FOR BALD HEADED WOMEN.
"But—but this is so sudden, Mr. Willis," murmured Prudie, confusedly. "Please wait until to-morrow night, and I will answer you."

"Sudden!" exclaimed Mr. Willis, sharply. "Sudden? Why have I been waiting on you over a month, and you certainly must have guessed my intentions in this time?"

"I cannot answer you to-night, Mr. Willis," replied Prudie, with some spirit.

"Very well, then," said Mr. Willis reluctantly. "I will come for my answer to-morrow night. And in the meantime, dearest, remember that I love you more than life itself. Good night."

When Prudie went to bed that night she lay a long time awake, earnestly considering Mr. Willis' proposal; and the more she thought it over the more she saw Joe Barton's sorrowful face and sad, pleading eyes as they had appeared to her at the singing school that night, until at last she was obliged to admit to herself that she really loved Joe better than ever before, and decided to say "no" to Mr. Willis when he should come for her answer.

The next morning, however, she awoke to the fact that a terrible calamity had befallen her, and the news spread like wildfire throughout the village that the great fortune Aunt Dorothy had left her had dwindled away to a large tin box full of worthless papers.

Prudie was not very mercenary, and when the rumor was confirmed by a note from Lawyer Grubb she did not take it very much to heart, but smiled broadly. "This nonsense will end!"

And into the basket exulting he sprang. You see his mistake; for his heavier weight To the surface the Rabbit fled speedily

Who said, while ascending, "Life's changes
are great—

Now up and now down! Mr. Reynard,
adieu!"

Then off hopped the Rabbit, and lived, I suppose.

FOR THE HOUSEWIFE.

OATMEAL.
The manufacture of oatmeal from oats is very different from the making of flour from wheat. The cleaning processes in the first place involve much more labor and require more time and machinery, the oat kernel being encumbered with its hull and more bulky and difficult to separate from foreign substances. After cleaning and before hulling, the oats are dried by heat, an operation demanding still more special machinery, and requiring time and careful attention. After drying they are cooled and sent to the huller.

A small boy of round shoe buttons with a curved needle and lengths of coarse linen thread easily could make a place in the top drawer of every woman's dressing case or chiffonier. Then the task of replacing a missing button simplified itself wonderfully. On children's shoes, particularly, the patent fastening should never be used, for in their composition, fasteners, leather and all are apt to disappear.

A good plan to carry out regarding shoes for the little ones is to rub them well with castor oil before they are worn at all. This makes the leather pliable, fits up the pores, and prevents it from cracking. For a few weeks the day goes on in two weeks is not too often to oil them. At first the oil will give them a gray look, but after an hour or so is passed the finish they show is nice and soft.

If the hair is falling out, remember that it is owing to an unhealthy condition of the scalp. First, cut off about two inches of the hair, next wash with a crash towel; then begin the fifteen minutes brushing process, and in a few weeks you will see the tiny sprigs of new hair coming all over your head.

Beware of being tempted to use of my nostrum whatsoever, no matter how plausible the advertisement thereof; all we are more or less injurious—generally more, as you will find out to your sorrow if you begin the use of them.—*Good Housekeeping*.

GOOD COMPLEXION.

FASHION NOTES.
For shoulder caps will be worn during the cool days.

Small mantles are produced in short silk and finished with lace.

The majority of the new gowns for bridemaids are tailor-made and very elegant.

Elizabeth ruffs of fur, with long ends to hang down in front, are to be fashionable this winter.

Some of the handsomest dress patterns now come from Germany, much to the disgust of the French.

China crêpe camel's hair, faille and armure are the favorite materials for dark blue autumn costumes.

Ruddy brows are prominent among many of the fashionables this season.

Garden sieves and half shawls of white muslin and lace are worn with hats or shirred muslin to correspond.

Newest glove boxes are very long, and are made of the finest cashmere silk mounted in gold or silver, and lined with satin tufted.

Some of the handsomest of the evening gowns have ostrich feather trimming four inches wide all around the court train as well as upon the waist and sleeves.

Entire bonnets and brims of flowers and foliages in popular favor, roses and foliages of velvet and rich sarcenet blooms taking the place of the daintier sprays used earlier in the season.

A PROSPEROUS CHINESE DOCTOR.

A celebrity among the Chinese in San Francisco is their great doctor, Li Po Tai. He has been in this country nearly thirty years, and has a larger income from his profession than any white practitioner in the city. His patients all come to the offices when able, and Li Po Tai sits up, habited in gorgeous gowns and brocades, in a little den of an office overlooking the plaza, and feels as though he were in his own home.

Li Po Tai rests the patient's elbows on a blue silk cushion, and proceeds to wash the face with water from a basin.

Electric Railways.

Plans for electric railway transit are now under consideration in this state, and among others the project for a line between Abington, North Abington and Rockland, including a possible extension to Brockton, is being considered. Now that Weymouth is provided with an electric plant for light and power, the question of an electric railway through the town is being considered, and should this be considered a continuous line of railway could be furnished to Boston by connection with the Quincy line at the bridge, and our cars brought into close communication, which would give business and real estate a good boom. That the enterprise would be a success many of our residents fully believe.

Electric transit is to be a general means of travel in the future, and it's prophesied that all railways will eventually adopt this system, some even asserting that the new port-electric system will take the place of present appliances, and passengers be seated at a speed of 20 miles per hour. As far as practicability of attaining this speed, the electrical Review says there is real value in nothing to prevent it. The wheels of the average passenger coach are in this country, 35 inches in diameter, and they make about 600 revolutions per minute, but frequently short runs of 70 miles rate are made, raising the speed to 22, which is safe. With wheels five feet in diameter the desired speed of travel would require but little over 1000 revolutions per minute, and would be safe, considering the fact that the cars would be greatly smaller and lighter. The motive power would prove sufficient to move the load which would best suit the designer of motors and other devices for street cars, would not be apt to overload and would be limited to the facilities with which the circuit could be guaranteed, and the circuit divided into separate sections. Power required would be less by reason of the weight of the car, weight of rolling stock and ability to use highly efficient stationary engines instead of present locomotives, and the fuel consumed per car less than is present. The permanent way in some respects might be more costly than the usual construction, but in other respects it would be so, because the system would be more or less independent of grade and for that very reason would be more or less reasonably straight and curves of great radius only adopted.

The Bird With a Broken Wing.
I walked in the woodland meadow,
Where where the thrushes sing,
And found on a bed of moss a
Bird with a broken wing.
I led him to the brook,
To wash his head, and strain,
The bird with the broken wing
Never sang so high again.

For a little while I took
By his sensitive part,
And tended with a Christ-like pity,
I took him to my heart.
He lived with a noble purpose,
And struggled not in vain,
But the bird that had stricken
Never soared so high again.

But the bird with a broken wing
Kept another from the shore,
And the life that had stricken
Such loss has in its power,
There are feelings for every pain,
But the bird with a broken wing
Never soars as high again."

BY STRATEGY.

Tom Rabin, a young farmer, had just left Katie Field in the orchard where, with happy blushes suffusing her bonnie young face and shy glances from her merry blue eyes, she had promised him to be his wife.

Tom knew that Farmer Field, Katie's father, had looked upon his coming to see Katie with disfavor, but so long as there were only dark glances to restrain him, he had continued his wooing until the gentle girl was won. Now, however, when he was sure that Katie loved him, he hastened to give her father's consent also, never dreaming that it would be given, even if in a reluctant and grudging way.

Mr. Field was sitting on the porch smoking his pipe when Tom made his appearance.

"Hum," grunted the old man, "what can folks be wanting running around the neighborhood at this time of night?"

"I have come to ask your consent to marry Katie," replied the straight-forward Tom Robin.

"Well, you'll never get it."

"What have you against me? I am well able to take care of a wife, and I love Katie and she loves me and has promised to marry me."

"That doesn't matter," growled Mr. Field. "I've said you can't have her, and so you can't."

"Very well," said Tom dryly. "Nevertheless, if Katie is willing to marry me without your consent, I shall have no compunction in taking her away from you."

The old man sprang to his feet and shook his horny fist at Tom.

"If I catch you prowling around my premises after this," he cried, "I'll fill you so full of buckshot that you'll weigh a ton."

Just then Dick Field, Katie's brother, came out from the house, and in passing across the porch he gave Tom a nudge and wink, which the latter understood.

"All right, Mr. Field," said Tom smiling as he turned to walk away. "If you think that a murder will make your conscience feel any easier after the injustice you have done to your daughter and myself to-night, you are at liberty to commit it, as far as I am concerned, for I shall certainly come again to see Katie."

"You cheeky young rascal!" Mr. Field shouted after Tom. "If you don't think I'll shoot, just come and try me."

In a roundabout way Tom returned to the orchard again, where he found that Katie had been joined by her brother Dick. Dick had been telling Katie of the reception their father had given Tom, and was laughing and teasing her about it when Tom appeared.

"And did papa threaten to shoot you, sure enough, Tom?" Katie asked, looking into his face with troubled eyes.

"I believe he said something to that effect," answered Tom, "but that was just to try to scare me away, you know."

"Don't fool yourself," put in Dick. "When daddy said he'd shoot, he meant it. So don't go and expose yourself unnecessarily, for when he says a thing he generally means it."

Tom and Katie knew the old fellow's obstinate character only too well, and had to admit that there was some danger of his carrying out his threat. Therefore it was agreed that Tom should stay away for some time, and Dick promised to carry all the messages that the lovers wished to send to one another.

All this time the obstinate old man had chucked to himself in thinking how his threat had kept Tom Robin away from his daughter. But that evening, in coming down from her room, where she had gone to deposit some of her purchases, Katie dropped a note on the stairs, which her father picked up and read. The note ran as follows:

DARLING KATE.—I can be had at 10 o'clock tonight. Be ready. I will have the ladder concealed in a convenient place and will take only a few steps to raise it again. Then, when you are ready, my strong arm will carry you to the ground, when, together, with all possible speed, we will hie us to the place where we will be made one in spite of cruel parents. Be brave, dear one, and all will be well.

Lovingly, Tom.

"Oh, that's your little game, is it, Tom Robin!" exclaimed Farmer Field, after perusing the contents of the note. Then he muttered grimly to himself: "But I guess I can keep awake till 10 o'clock and stop it, Shoot! Why, of course I'll shoot! I'll fix my gun right away. I'll just put in a charge of powder, and it will be fun to see the cheeky young rascal run when I blast away."

For the next half hour the old man was busy drawing the charges out of his double-barrel shotgun, and reloading again with powder. When everything was in readiness he hung the weapon again on its hooks above the door and went chuckling about his business.

Dick and Katie also seemed to have some quiet fun that evening, for whenever they met in their several duties about the house, they would look at each other and laugh, as if something were about to happen.

Kate, however, seemed to be in some doubt, for at one time when she met

Dick on the stairs, where no one was near, she whispered, "Oh, Dick, are you sure everything is right?"

"Certainly. You just be ready, and Tom and I will be on hand to do our part."

It was about 10 o'clock, when some unusual noise awakened Farmer Field out of a doze into which he had fallen where he was sitting in the corner of the hall, with the gun across his knees. He rubbed his eyes for a few moments when he was fully awake and stole out into the yard.

There was no moon, but the night was clear and bright with starlight. As the old man peered cautiously around the corner of the house he could see the ladder leading from the ground to the window of Katie's room, and about half-way up the ladder was the form of a man, apparently in the act of ascending.

The next moment, the irate old man raised the gun to his shoulder and fired. The form on the top of the ladder toppled over and fell to the ground, where it lay still and motionless.

Farmer Field stood irresolute. He had expected to see the man jump to his feet and run; but when the fellow lay so still and silent a sudden fear took possession of him, and he was about to turn and retreat into the house himself, when someone grasped him by the shoulders from behind, and snatched the gun out of his hands.

Mr. Field turned around. There stood Tom Robin facing him.

"You're a miserable father, Mr. Field," said Tom in agonized tones. "Here you have probably killed your son, Dick. How do you feel as the murderer of your son only son?"

Mr. Field groaned. "I don't see how it could have happened," he managed to say. "I only fired with powder." Then taking a look at the gun in Tom's hand, he exclaimed:

"My God! it is Dick's gun, and I know it was heavily loaded with buckshot. How could it have happened?"

"You will probably have to explain that day to a jury," said Tom severely.

"But I can't. For God's sake, Tom, go and see if Dick is dead," wailed the old man.

Tom approached the man lying on the ground and examined him closely, then he returned to the old man and whispered: "Dead as a doornail."

"Hush," cautioned Tom, "there is some one coming driving along the road. If you consent to my marrying Katie, I will say nothing about what has happened tonight, and do all in my power to shield you, while if you refuse, I will give the alarm and have you arrested right away."

"Oh, save me, Tom! You can have Katie, and anything else you want that belongs to me," whined Mr. Field.

"Tom hurried to the body lying at the foot of the ladder, and picking it up he ran and dumped it head foremost into an old, dried-up well that was close to the house.

Just then the buggy that had been heading coming up the road stopped at the gate, and a few moments a man was seen walking toward the house.

"Good evening, squire," said Tom, as the man came close enough to be recognized. "You are just in time." Then, turning to Mr. Field he continued: "If you will bring Katie into the sitting room, we will have the ceremony performed immediately."

The old man seemed dazed, but he obeyed Tom's command without a question or a murmur.

Tom conducted the squire into the house.

Mrs. Field met them at the door and kissed Tom in a motherly way, as she murmured: "I'm so glad that every thing is coming off pleasantly."

Just then Mr. Field, looking pale and haggard, came into the room, leading the smiling and happy Katie by the hand.

TRAIN THE GIRLS.

When a girl is ten years old she should be given household duties to perform according to her size and strength, for which a sum of money should be paid her weekly. She needs a little pocket money and the knowledge how to spend it judiciously, which can be given by a mother to her little girl. She should be required to furnish a part of her wardrobe with this money. For instance, if she gets ten cents a week she should purchase all her stockings, or all her gloves, as her mother may decide; and doing this under the mother's supervision she will soon learn to trade with judgment and economy. Of course the mother will set it to that the sum is sufficient to do this, and yet leave a trifle for the child to spend as she pleases. This will supply a healthy stimulus; it will give her a proper ambition and pride in her labor, and the ability to use money properly. As she grows older these household duties should be increased, with the proportionate increase of money paid for the performance of them. We know of a lady who divided the wages of a servant among her three daughters. There is a systematic arrangement of their labor, which is done with a thoroughness and alacrity rarely found, either with a hired girl or a daughter who feels that she has to do, with nothing to encourage or stimulate her in the work.

Courier-Journal.

A FEMININE SUPERSTITION.

Among the many amusing superstitions of women, perhaps the one that does the least harm and affords any lady the greatest amount of satisfaction, is the wearing of the birthstone as a sort of amulet or charm to bespeak good luck and to ward off all those hidden misfortunes that the veil of the future would most certainly reveal were it not for this same potent talisman. A very charming woman whose birthday chance to fall in the month of July insists that she never had any luck until she adopted the ruby for daily wear, and no amount of railing and persuasion can induce her to appear for a single day without having this beautiful stone somewhere about her, either in a ring upon her slender finger, a circlet upon her arm or hidden somewhere in the lace about her throat. It may be only a tiny point of fire, but it suffices to warn the envious fates that its lovely possessor is guarded against their baneful influence. The opal, a stone of such unlucky omens that few women will wear it at all, loses all its objectionable qualities when worn as a birthday stone. When the birthstone chances to be one of the secondary stones, and therefore unsuitable to be about the toilet used, it is often cut in a seal, and mounted with the monogram and crest of the owner, exercises its occult influence just as benignly when stamping the billots-doux and dinner invitations of madame. —New York World.

THE CARE OF THE HAIR.

Bruh the head twice each day with a bristle-brush, not too stiff, but sufficiently to penetrate the scalp. Brush forward, backward, up, down and sideways. This process will invigorate and soften the hair. Fifteen minutes twice a day devote to it you have the times.

Clip the ends of the hair as often as once in six weeks. It is better to have some one to do this for you as you cannot reach all the short hairs at the neck of your head. If you will examine your hair before clipping you will see numbers of split ends. Well, hair stops growing when it begins to split, so if you would insure a thick head of hair you must also insure even, healthy hair.

If you find it necessary to wash your head, do so in cold, soft water, perfectly clear, and rub with a crusted soap until dry. This is a tedious process, but unless it is thoroughly dried, dandruff forms, and if the hair is very thick it is apt to mildew. —Minneapolis Journal.

Two Interesting Documents.

The two most interesting documents that are to be found in the United States may be seen in the Lenox Library, New York City, which contains hundreds of rare historical documents. The two documents in question are the original manuscript of George Washington's farewell address and the letter of Christopher Columbus announcing the discovery of America.

LADIES' DEPARTMENT.

PASTRIES IN CLOSER.

Long cloaks are made of soft twilled wool with black brooch borders on colored grounds, or else brooch figures of great size—wines, leaves, arabesques or cones—all over the fabric in black, or in a darker color of the shade of the ground. Plum, dahlias, navy blue, drab, gray golden brown, and various green shades are among these handsome bordered and figured cloths. The black border extends down the front and down the middle of the back of some cloaks, while on others it forms a yoke at the top and a border at the foot. Some of the new models fit in the waist like a cuirass, with the skirt swell on the hips with its fullness massed behind, and long, wavy-like pieces from the shoulders covering the sides and arms. Others have five sleeves that are gathered at top and bottom, while many have caps that are full, like that of the Ursuline cloak, and still others have caps that are turned up underneath to hold the arm as if in a sling in a way long in favor. —Civile Antiqua.

It was about 10 o'clock, when some unusual noise awakened Farmer Field out of a doze into which he had fallen where he was sitting in the corner of the hall, with the gun across his knees. He rubbed his eyes for a few moments when he was fully awake and stole out into the yard.

Adjoined Town Meeting.

The adjourned town meeting was held at Engine hall, East Weymouth, last Wednesday evening. The meeting was called to order by the moderator, N. D. Cushing. The count of the teller, Mr. M. Maynard, showed a present, and an adjournment of ten minutes were made, at the expiration of which 100 were received as present, and the business adjourned.

Under Article 2 H. J. Humphrey made the following motion, which was carried unanimously: That the town hereby authorizes an increase of its debt for the purpose mentioned in chapter 174 of the law of 1861, to an amount not exceeding \$60,000, in accordance with the provisions of chap. 220 of acts of 1868, entitled "An act to make an additional water loan; and that its treasurer is hereby instructed to cause to be made fifty copies of this town's warrant of one thousand dollars as principal, payable in thirty years from its date, with interest payable semi-annually at the rate of 6 per centum, to be denominated upon its face "Weymouth Water Loan" and such bond to be sealed with its corporate seal and countersigned by the chairman of its board of selectmen. Also that its treasurer and controller be authorized to issue these bonds in such amounts and at such times as the board of Water Commissioners of this town shall by vote direct, to meet all such bills before issue, shall be approved by said board of Water Commissioners and signed by the clerk of the board in attestation of the same.

On Article 3 Hon. Jas. Humphrey made the following motion, which was also adopted: That the town hereby authorizes its treasurer, with the approval of its board of Water Commissioners, to sell the bonds authorized by its last vote, in such amounts as it deems expedient or private sale, or to pledge the name as collateral for money borrowed, for the purposes named in article 2, and that the same be entitled "An act to supply the town of Weymouth with pure water", and that the treasurer shall hold the receipt of the money so obtained in the name of the town, among the public leaders throughout the county and state is shown for record.

Under Article 4 \$100 was appropriated for the sidewalk at Shaw's corner, and the selection was authorized to come into effect.

\$100 was appropriated for the Middle street schoolhouse. The meeting was then adjourned.

Let there be light!

And there was light on our dark thoroughfares last Sunday evening, when the electric light furnished by the Weymouth Electric Light and Power Co. was flashed all over the town in a burst of radiance which excited general admiration. It was expected that the general lighting up would be commenced on Saturday evening, but owing to a fault in the connections, the lighting that evening was confined to the sidewalk at Shaw's corner, and the Middle street schoolhouse, on the Hingham circuit, so that Sunday, Oct. 20, 1869, will stand as the inauguration time of electric street lighting in Weymouth, an improvement which comes to stay, and with the necessary extensions in the future will receive the support of a majority of residents. A few changes in location of the arc lights is desirable, and better effect would be produced by greater elevation of the lights at some points. With the arc lights in the several squares, the intermediate spaces can be lighted with incandescent lamps, when incandescence is appropriated by the town for the purpose, and throughout the town the "gloomy, dismal shades of dark" will be utterly routed by the electric effulgence.

Sheriff of Norfolk County.

J. Walter Bradlee, the Republican nominee for Sheriff of Norfolk county, was born in Milton, Mass., March 17, 1841. He was educated in the public schools of that town, and the Milton Academy. When he came from Abraham Lincoln, he volunteered to cut out the Rebellion young Bradlee, always firm in his loyalty to friends and country, shouldered his musket and joined the ranks of the Union army. Returning home from the war, as supposed to die, he cast his first vote for Abraham Lincoln and has been a staunch member of the Republican party ever since. Rallying from effects of disease, brought about by army exposure, he associated himself in business with his father, John D. Bradlee, a man well known to the older voters of Norfolk county. In the year 1870 he was elected to the office of Sheriff, and was with much credit in office for ten years. Today he is chairman of the board of selectmen of his native town and year after year has received the unanimous endorsement of his fellow citizens. The late Sheriff Wood appointed him as a Deputy Sheriff and he has since been a familiar and popular officer of the court at Dedham. In the years 1884 and 1885 Mr. Bradlee was a member of the Legislature, representing the 4th Norfolk District, and during that time served as chairman of the Committee on Prisons. He early identified himself with the Grand Army of the Republic and was a member of the Executive Committee of the Weymouth Post, Milton. He has been upon the staff of two Department Commanders, Adele-Camp upon the National Commander's staff, and lately Commander of the Norfolk County Division, G. A. R. Mr. Bradlee belongs to Hyde Park Lodge of Masons, Norfolk Royal Arch Chapter and Cypress Commandery, and other organizations.

In the politics of Norfolk county he has ever been an untiring and successful advocate and worker for Republican principles, and when the Norfolk Club was organized, which now has a membership of four hundred Republicans, Mr. Bradlee was a member of the executive committee of the club. His character and habits are above reproach and his general qualities, and his executive ability have made for him a host of friends. His nomination for sheriff came without one word of personal solicitation or for any favor. The single dollar and the vote in convention of sixty out of a total of seventy-eight votes is evidence of the strength and fairness of his nomination.

Church Incorporation.

The church society held its adjourned meeting last Monday evening, to consider the dissolution of their parish organization and organization of a church corporation in its place. Rev. Mr. Smith, chairman of the committee on the subject, presented the draft of a constitution, by-laws, etc., which was adopted and it was voted to apply to the State official for the requisite charter. The present Prudential Committee, Messrs. M. E. Bryant, M. R. Bradlee and G. E. Holbrook were elected as a Standing Committee, the present Clerk and Treasurer also to continue, and as the new constitution includes the election by the church of officers of the Sunday school, the present board was chosen. The object of its movement is to do away with an unnecessary and cumbersome part of administration of society matters, bringing religious and secular concerns under the direction of one board of officers.

A Personal Statement.

BRIEF mention was made last week of the return home of Mr. Preston Pratt, whose absence of a week or more caused an intense family and public anxiety. The intelligence of his safety was received with general joy, and as many rumors have prevailed concerning the matter, Mr. Pratt has furnished us with the following particulars:

A BRIEF STATEMENT.

I left for Boston, Wednesday evening, Oct. 16, at seven o'clock, intending to call at my brother's residence in Pinckney street, and then take a train to my home. I had crossed the bridge and then turned to the left, when I received a blow on the back of my head, which caused me to drop my coat, as if I was struggling to my feet and when I began to rise to recover, consciousness. I saw I was sick and had no clear idea of what was going on around me. I saw two men who had a forced look, and I thought it was a police force. I was put ashore, and then turned to the right, to receive a little. I did not seem to meet any but colored people, and I was very much afraid of being captured. For the time being, we took a walk, my coat and my great coat, I was still very weak and bewildered, but had no clear instinct that I was in Boston. I was a black boy and found I was in Virginia. He directed me to a railroad, and in some way, I got to Washington. I think I slept in the station some time, and when I woke up my mind was clearer, felt more like it could be found in stock.

Mr. White, residing over Cronin's store, after a long illness with pneumonia, was recovering rapidly, and was soon able to walk across the state of New Jersey to New York, but after walking for two days, he became ill again, and could go no farther. At that point I met an old man, who saw at once my condition, and had quite a little money, and gave me a little to pay for the fare on a boat to Philadelphia.

This night ride gave me a new courage, and I started on my course to walk across the state of New Jersey to New York, but after walking for two days, he became ill again, and could go no farther. At

that point I met an old man, who saw at once my condition, and had quite a little money, and gave me a little to pay for the fare on a boat to Philadelphia.

James Fowler will build an annex to his house on Summer street.

Dogs killed a lot of fowls for Francis Kidder last week.

The new post office on the Cowling corner has been made to order, as nothing like it could be found in stock.

Mr. White, residing over Cronin's store, after a long illness with pneumonia, was recovering rapidly, and was soon able to walk across the state of New Jersey to New York, but after walking for two days, he became ill again, and could go no farther. At

that point I met an old man, who saw at once my condition, and had quite a little money, and gave me a little to pay for the fare on a boat to Philadelphia.

James L. Bates Camp 8, of V. have accepted an invitation to attend the anniversary of Gen. George A. Custer Camp of Whitman, Friday Nov. 1.

Letters remain in the postoffice for Mr. C. F. Mc Norton, Margaret Mar-

tine, T. L. Bucknell, P. M.

The third assembly of Z. L. Bucknell Hose Co. was held at Masonic hall last Friday evening, a very large party being present who enjoyed a grand good time.

At a meeting of Pilgrim Lodge 485, of K. H. held last Tuesday evening T. B. Loud and E. Q. S. Litchfield appointed representatives from their committee to the Grand Lodge visitor keeping on Lincoln street Nov. 5.

Cards are out announcing the marriage of Elmer L. Gibbons former citizen of this village, to Miss Mary A. Miller, daughter of Mr. and Mrs. J. C. Eldridge, of East Weymouth, the bride a widow of the late Edward Abbott, formerly of Weymouth.

Mr. Reidy, a well known and aged citizen, died at his residence on Union street, South Weymouth, Sunday, of rheumatism of the heart, and was buried in the cemetery at the foot of his trade, brickmason for Mr. Endicott, and the charge used by his corrupt means to influence voters in a court case may be seen in the paper.

Mr. Harvey King is here from the west, visiting his son, and appears to be settling down for the winter. Their children have been taken care of by his trade, brickmason for Mr. Endicott, and the charge used by his corrupt means to influence voters in a court case may be seen in the paper.

Mr. and Mrs. Hiram Porter, Mr. and Mrs. Hiram, H. H. Raymond, Joshua Cook, Benjamin Writington and Charles Crans attended the State Reform Club convention at Lynn last Saturday, and delegates from the East Weymouth club.

Wompatah Encampment will work the Golden Rule and Patriarchal degree upon two candidates. A number of prominent men will be present and a collation will follow the business of the evening.

A large delegation from Crescent Lodge went to Hingham Sunday evening, and the evening's address was given by Mr. S. L. Chapman, of Weymouth.

Mr. Reidy was thrown from his carriage on High street last Friday by her horse running away. She escaped uninjured, but the carriage was upset, and she was unable to get out.

As far as possible, the horses were removed from the carriage, and the driver was not injured.

Mr. and Mrs. Michael and Daniel, Philip and Jacob of Malden, and Mrs. Hannah Coleman of Boston. The funeral was held Tuesday morning from St. Francis Xavier church and the interment was at Quincy, a long array of carriages filled with friends of the deceased, accompanying the remains to the cemetery.

The School House Clock.

Mr. Editor.—With your permission I wish through the medium of your valuable paper, to make a statement to the good people who so generously contributed to procuring the clock on the Jefferson schoolhouse, Middle street.

Much credit is due Mr. F. B. Reed, our local jeweler, through whom the clock was purchased, for his time and the reduced rates he obtained.

The whole amount subscribed was \$222. Clock \$200; sterling silver and expense of setting up, \$20.

Mr. and Mrs. Bradlee, which if there is no objection, may be used for the purpose of purchasing an organ to be placed in the schoolhouse, or if preference is given to another organ, to be placed in the schoolhouse for the purpose of displaying goods. The office has been relocated and now show cases added.

At the present rate, Brussels soap will soon drive all others out of the market.

We learn that Willard Hunt has used the shoe factory, to engage in the fruit business.

Miss Sarah Anthony Tracy and Albin Richards were thrown from Mr. Tracy's fine wagon and considerably bruised.

Mr. and Jane Nash is preparing to return to Riveira, Cal.

There should be an electric light on Mount Pleasant, a mile from town.

There is a beauty in town for pedestrians or teams; the sidewalk is narrow and no one ever thinks of using it after dark, for fear of stepping off and causing injury.

F. W. Lewis, Esq. was in town early this week.

Mr. Chas. Merritt of Milford, has been here from the west, visiting his parents, Mrs. M. L. Gardner.

Mr. Frank Hunt's condition remains unchanged since last reported.

A. Richards, of Smith's Pharmacy, is a graduate of the college of pharmacy.

Mr. Richard Loud is having his residence painted by knight of the brush from North Weymouth.

Philip and Jacob of Malden, and Mrs. Hannah Coleman of Boston. The

funeral was held Tuesday morning from St. Francis Xavier church and the interment was at Quincy, a long array of carriages filled with friends of the deceased, accompanying the remains to the cemetery.

The School House Clock.

Mr. Editor.—With your permission I

wish through the medium of your valuable

paper, to make a statement to the good people who so generously contributed to procuring the clock on the Jefferson schoolhouse, Middle street.

Much credit is due Mr. F. B. Reed,

our local jeweler, through whom the

clock was purchased, for his time and the reduced rates he obtained.

The whole amount subscribed was \$222. Clock \$200; sterling silver and expense of setting up, \$20.

Mr. and Mrs. Bradlee, which if there is no objection, may be used for the

purpose of purchasing an organ to be

placed in the schoolhouse, or if pre-

ference is given to another organ, to be

placed in the schoolhouse for the

purpose of displaying goods. The

office has been relocated and now show

cases added.

At the present rate, Brussels soap will

soon drive all others out of the

market.

With many thanks to one and all who

so generously assisted in the clock en-

terprise, I am

Respectfully yours,

D. M. EASTON.

Concert.

A grand concert was given in Trinity church last Tuesday evening, under the direction of the organist and musical director, Mr. John H. Gutierrez, the entertainment being given to the benefit of the interior of the church.

A good audience was present and the concert was one of much merit and received the entire applause of the audience.

The programme, with the exception of the solo of Mr. Redfern, who was ill and unable to perform, he conducted the same.

With many thanks to one and all who

so generously assisted in the clock en-

terprise, I am

Respectfully yours,

Lovell's CORNER.

Mr. Elmer Whittier, formerly of this

village, now of Brockton, has been vis-

iting a few days here with her parents.

Mr. Jeremiah Quimby and Mrs.

Henry Burdick have returned home

from a three months visit to Chicago.

Mr. Ansel Holbrook is enlarging his

stable.

The small boy was "on deck" last

Monday evening, parading the streets

with the glee of a horn player, and

parading the bright lights of the elec-

tric lamp on Broad street.

There are nine electric lamps on

Broad street from Binney's corner to

Jackson's and on Jackson to

Water street.

Are there any more buildings on Broad street than there

are on Water street?

There are more travel upon the former than there

is upon the latter? Cut the "Gordian knot."

GUNS.

Having purchased the entire stock of Gunsmiths, etc., etc., of which there is a large quantity, we are going to offer them to our customers at prices, in many cases, less than the cost to manufacturer.

Here is a sample of the greatly reduced prices at which we are closing out these goods:

Breech-Loading Double Gun, Top Snap Action, Pistol Grip, Extension Rib, Rebounding Locks. In fact, all the modern improvements. Reduced to \$12.50.

This is but one of many bargains we have to offer while this stock of Guns last.

400 REVOLVERS,
3d Caliber. Former price \$4.00,
Reduced to \$3.00
EACH.

(By Mail, Post Paid, \$3.25.)

The Revolvers are of the celebrated Remington make.

At this extremely low price we cannot send either GUNS or REVOLVERS C. O. D.

All orders must be accompanied by the cash.

We invite all to call and examine these goods.

JOHN P. LOVELL ARMS COMPANY,
Cor. Washington and Brattle Streets,

CUTTING AND BASTING A SPECIALTY.

No. 4 Jackson Square, East Weymouth.

Old Reform Club Building. ON 3d Cal.

THE SECRET BALLOT.

any one. Pass to the ballot box and give your name to the officer in charge and put the folded ballot into the box with the certificate of the Secretary of the Commonwealth uppermost and in sight. No ballots can be carried away whether spoiled or not. If a voter declares to the presiding official that he was a voter before May 1, 1857 and cannot read, or that he is blind or physically unable to mark his ballot, he can receive the assistance of one or two of the election officers in the marking of his ballot.

A list of candidates, cards of instruction and specimen ballots will be posted in the polling places as required by law, where they can be easily read, but it is much better to be booked up, on the subject before election day, as it will save time and prevent mistakes which might occur through hurried reading of the greatly reduced prices at which we are closing out these goods:

SCIENTIFIC SCRAPS.

Mr. Duthe, botanical director for Northern India, advocates the use of flowers of the Callicoum for food in northwestern India.

In a recent report on magnetic rock among the hills of Upper Burnash, Dr. Noontoo describes a mountain or hill at Singing, which consists of a huge mass of iron ore.

More than 1000 peaks in the Himalaya have been found by measurement to exceed 20,000 feet in height, and it is estimated that at least 2000 reach this altitude. In the Alps there are two peaks more than 15,000 feet high, and six or seven over 14,000 feet.

The new piano invented by Dr. Eisenmann of Berlin can, by the aid of electro-magnetism, sustain or diminish sound; another and valuable novelty in its construction is that by moving the electro-magnets the tone of the tone is changed, as, for example, from that of a violoncello to piccolo.

Pita, the new remedy for hydrophobia recently discovered in Spain, seems to be a name given to the flower stalk of the aloe, a plant common in some parts of Spain. The story goes that its virtues were discovered accidentally by a man in a fit of hydrophobia falling upon an aloe plant and unconsciously biting the stem.

The noiseless powder is not a new invention. In the third volume of Benvenuto Cellini's autobiography the author relates that when suffering from fever in Ferrara he cured himself by eating peacock's feet, and that he procured the birds surreptitiously by shooting them with powder "invented by him, that made no noise."

Carbolic acid is now much less used in surgery than formerly. Surgeons have only gradually become acquainted with its dangers. The acid may not only cause inflammation and gangrene, but also blood poisoning, and so may even prove fatal. It is useful only in the hands of a skillful surgeon, and ought never to be used without his advice. The best lotion for recent injuries is the ordinary lead lotion, which can be bought at any chemist's.

That the eastern half of our continent is slowly founders in the Atlantic is a fact well known to science. The rate is slow—a few inches in a hundred years—but like Mercutio's wound it is "enough." It affects not only the coast, but also the interior, which is as wide as, and when folded, of the same dimensions as heretofore required by law.

On the back and outside is a feature of the ballot, like a thumb nail, which is often found in the flower stalk of the aloe, a plant common in some parts of Spain. The story goes that its virtues were discovered accidentally by a man in a fit of hydrophobia falling upon an aloe plant and unconsciously biting the stem.

It affects not only the coast, but also the interior, which is as wide as, and when folded, of the same dimensions as heretofore required by law.

In France when a patient is under chloroform, or the slightest symptom appearing of failure of the heart turn him nearly upside down, that is, with his head downward and his heels in the air. This, they say, always restores him, and such is their faith in the efficiency of this method that the operating tables in the Paris hospitals are made so that in an instant they can be elevated with one end in the air, so as to bring the patient into a position resembling that of standing on his head.

Now for a few suggestions to voters.

A person desiring to vote must give his name to one of the clerks, who will announce it in an audible voice to another officer, who, if such name can be found upon the check-list, repeats it, and the person for Brackett for Governor, he must mark the ballot in this way:

"Oh, dear, I wish it were men that did fancy work," sighed a girl in a store where only fancy work and fancy materials are dealt in; "women are so hard to please," she explained.

"Now, there's that woman that's just gone out; she don't know the first thing about what she's going to do, yet she stopped me off short when I tried to tell her, as though it was an insult to me to insinuate that she didn't know all about it. In a few days' she'll be back here complaining that I didn't sell her the right thing for the work, or something like that. There's droves of them like her; they come here on purpose to find out how to do something, and yet if we take it for granted that what they want, and try to tell them, they're indignant. We must teach them all about it, and at the same time we mustn't let on about it. Do you think men would be that way?"

"She's there's another thing about women; they want you to be always waiting on them. There are those big books, full of designs for stamping and such work; now, you'd think, if you put one of those books down before a woman, and get her started in it, she'd be able to turn the pages herself, until she came to something that suited her. But is that not such. I've got to stand right there and turn every page

for her, or she thinks she's being neglected. You should see the looks they give me when I turn away for a moment to attend to some other customer. It isn't my judgment on the designs that they want, for they never talk to me, even if I tell them, no woman ever takes another woman's judgment on such a matter."

"Then there's the ignorant women that haven't any idea about fancy work, and yet that you mustn't offend. The other day we had a customer in the win low, with designs to be worked stamped on them. A placard said that silk to the word was included in the price of the scarf. There was also in the window an elegant hand-painted scarf. A woman came in here and ask to look at that scarf. I showed it to her and I told her the price. She admired it greatly, said she'd take it, and cautioned me not to forget to put the silk to work it with! She wouldn't take it at all when I told her hand-painted scarfs didn't have to be worked, and I think she went away angry because I smiled when I told it. —*Eastern Traveller.*

LADIES' DEPARTMENT.

THE HOUSEWIFE TREATMENT. Heroic treatment has been adopted in the case of the Queen of Sweden. Her nervous condition having occasioned great anxiety led the mind to become disordered, the physicians have decided her to sleep her rooms, attend to various household duties, and to take frequent exercise by long walk in the sunshine. Boehrke, the famous physician, once said that a man was more likely to receive permanent benefit from climbing a tree than by drinking a decoction made of its leaves. He saw remarkable qualities in the exercise greater than those in the medicine.—*New York Tribune.*

HOW THE ARABS MAKE TEA.

The mistress of the tent, placing a large kettle on the fire, wiped it carefully with a horse's tail, filled it with water and threw in some coarse tea and a little salt. When this was near the boiling point she towed the silk to the bottom of the kettle. Then she took the silk out with a brass ladle until the liquor became very brown, and then it was poured into another vessel. Cleaning the kettle as before, the woman set it again on the fire in order to try a paste of meat and fresh butter. Upon this tea and some thick cream was then poured, the ladle put in regulation again, and after a time the whole taken off the fire and set aside to cool. Half-pint wooden mugs were handed around and the tea ladled into them, the tea forming meat and drink, and satisfying both hunger and thirst. However made, tea is a blessed invention for the weary traveler.—*Eastern Traveller.*

PASSION NURSES.

Exquisite ashes, with and without winter.

Tea jackets and **blouse bodices** are necessary to a fashionable woman's wardrobe.

PRINTED DELAINES FOR TEA GOWNS.

Hand-printed delaines for tea gowns are among the prettiest fabrics imported for the coming season.

UNMITIGATED FITNESS AT THE BACK IS A STRIKING FEATURE OF THE COSTUMES JUST RECEIVED.

Unmitigated fitness at the back is a striking feature of the costumes just received from abroad.

SYLPH TRAVELING DRESSES.

Sylph traveling dresses are made of French gray or olive camel's hair, with Ursuline cloaks to match.

SHOES ARE NOW MADE OF A HAIR OF THE BULL'S HOOF.

Shoes are now made of a hair of the bull's hoof fastened with a bow on the shoulder, and do not leave the arms quite so exposed.

FEATHER TRIMMINGS WILL BE USED ON COMING WINTER.

Young pellets ought all to be laying this month. Later hatched ones if not laying by December, will lay, probably, if fed well, and not lay for some time. Their eggs are laid in clusters of 15 cents per dozen.

Some of the new wraps are shaped like caps in the back and barely reach to the waist, but they are long enough in front to touch the edge of the dress.

Many of the stylish wool gowns have pretty loose waists of silk, belted and worn with Beau Brummel coats that have loose fronts and jersey-fitting backs.

It is rumored that trained dresses for evening, carriage and street wear are to be revived. It will take more than one year to reintroduce so inconvenient a fashion.

MR. CLEVELAND'S NEW HOME.

Mr. Cleveland's new abiding place is to contain a great deal of antique mahogany furniture, which is with its young master quite a hobby. As opportunity offered she has purchased old chairs, tables and chests of drawers which might have formed the furnishings of stately colonial mansions with cedar or painted with vermilion shading the quiet life for those who else are homeless. This, I believe, is the woman's true place and power.

THE WORD "WIFE."

What do you think the beautiful word "wife" comes from? It is the greatest word in the English and Latin language; conquered the French and Greek. I hope the French will someday get a word for it instead of femme. But what do you think it comes from? The great value of the Saxon words is that they mean something. Wife means "woman." You must either be housewives or house-maids; remember that
